## TRUFLAME TECHNOLOGY

### Most Realistic Flames

Complementing the logs and giant ember bed, TruFlame Technology includes two burners for independent front/rear burner control of the ultra-realistic flames. With both burners in your control, you can call for a roaring fire, a low glow, or anywhere in between.

The multifunction remote operates as a conventional thermostat, a Smart Thermostat which modulates flame height as the room reaches the desired temperature, or as a manual control. The remote also operates the included accent light.

A photograph of a modern living room. In the foreground, a dark wood coffee table is partially visible. To the right, a red sofa with a patterned pillow is shown. The background features a fireplace area with a large framed picture of flowers on the wall. An arched doorway leads to a dining area with a table and chairs, and a kitchen area with a brick wall and a window. The lighting is warm and ambient.

## RENEGADE CLEAN-FACE Direct-Vent Fireplace

Available in 36-inch and 40-inch models, the Renegade features a dual burner that creates a tall lively fire, accented with your choice of the Traditional Charred or the Driftwood log set, and large glowing ember bed. The huge ceramic glass front allows heat to easily transfer in to your living space and provides a clear view of the fire.

While the Renegade is a visually stunning fireplace, what you can't see makes it even more impressive. TruFlame Technology - featuring a ceramic catalyst - minimizes emissions while maximizing heat efficiency. This results in the most realistic flames, reminiscent of a wood burning fire.

An external air control eliminates the guesswork during setup and allows your dealer to fine tune the flame, ensuring a beautiful fire.
