installation and maintenance

Before connecting the faucet to the water supply, flush the tubing thoroughly to eliminate any residue.

Cleaning and care instructions

It is recommended to wipe faucets dry with a soft cloth after use to avoid spots left by mineral deposits when water evaporates. Avoid harsh and abrasive cleaners on all faucet surfaces. Use only a soft damp cloth with mild liquid soap to clean the faucet surfaces of all finishes including coated polished brass, gold, brushed nickel, etc. Painted and plated surfaces alike, should be coated regularly with a thin protective film like a non-abrasive liquid car wax period (recommended).
