What you need to know

Tools:

Adjustable Wrench
Groove Joint Pliers
Hacksaw
Phillips Screwdriver
Pipe Tape
Spatula
Spirit Level

Safety Tips

If you are soldering during faucet installation, remove cartridges, seats, gaskets and washers prior to applying flame, otherwise you will void the warranty.

Cover drain openings to avoid losing small parts.

When cutting or soldering pipe, use safety glasses to protect your eyes.

Things You May Need

Correct installation may vary depending on previous faucet installation. All necessary supplies required for faucet installation are not included, but may be found where plumbing supplies are sold. It is suggested that IAPMO and/or CSA approved plumbing supplies are used during installation.

Standards

IAPMO/cUPC Listed
Meets A112.18.1

Maintenance

Your new bathroom faucet is designed for years of trouble-free performance.

Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, wire wool and harsh chemicals as these will dull the finish and void your warranty.

Important Points

Prior to beginning installation, turn off the cold and hot water lines and open the old faucet to release built-up pressure.

Overtightening nuts may cause damage.

Wrap all threaded connections with pipe tape available at your local plumbing supply store. Always wrap in a clockwise direction. The fittings should be installed by a state-licensed plumber.

Flow Rate

Steps 1-2

Installation Procedure

Lefroy Brooks always recommends that plumbing products be installed by a licensed professional. Shut off main water supply before installation.

1 Make sure that main water supply is shut off before further installation. Take off all rubber protective caps, plugs from valves, as well as the underneath protective bubble bags.

2 Install handles.

Steps 3-4

Installation Procedure

Lefroy Brooks always recommends that plumbing products be installed by a licensed professional. Shut off main water supply before installation.

3

- 3** Important: It is recommended that to prevent the spout from accidentally rotating after installation, where possible, the small brass pin should be screwed into the spout base. Drill a 1/4" (5.5mm) diameter hole into the deck to a depth of about 7/16" - 9/16" (11-15mm), following the position indicated in the figure above.

4

- 4** Place spout over spout hub and insert pin into the small hole on the deck. Finish installation by inserting set screw into access hole in back of spout and screw tightly.

Steps 5

Installation Procedure

Lefroy Brooks always recommends that plumbing products be installed by a licensed professional. Shut off main water supply before installation.

5

6

5 Attach hand shower with final trim installation.

6 After installing faucet, remove aerator and open the hot and cold supplies. Check for leaks. Turn on faucet handle for one minute to flush debris from faucet. Turn off the water supply, install the canopy and handle, then reassemble the aerator.
